

Art and Design – Photography

Summer work for Photographers:

The following to be presented in an A5 mini brown sketchbook:

Research 2 Photography exhibitions online - if you can visit the galleries then even better
Present in the brown books (these will have support sheets to help with the list below)

Include the following:

Visual stimuli - particular photographs of interest / the gallery itself / the space / scale of the work

Contextual understanding of the photographer - their inspirations and intentions of their work

Screenshots of elements of the exhibition that interest you

State which formal elements you believe are seen in the work

Compositional techniques - such as using the rule of thirds / vantage points...

Presentation should be kept minimal and clean.

Produce a photoshoot in response to either of the exhibitions you look into - 20 x photographs.

6 x Basic edits using Creative Cloud.

If printing is a challenge over the summer, then this can also be done as an online presentation, either using Canva or another similar program. AVOID too many pages, make each slide/sheet compact with images and information.

Thanks,

Charlotte
