

Gillingham School A-Level Psychology Summer Work

Aim:

- To gain an understanding of the research and theories developed by a range of famous Psychologists.

How will this help you?

- Each Psychologist worked within a different area of the subject. By exploring their work you will start to think about the range of different fields of study which we will cover during your time as an A-Level Psychologist.

Instructions:

- Each sheet has the name of a famous Psychologist. Your job is to find out some of the important information about that person.
- You will need to find a picture of them, work out which topic of Psychology they worked within, some details about their most famous theories or studies, and what their lasting contribution to Psychology/society is.
- Once complete, please bring a printed copy of this work to your first Psychology A-Level lesson in September.

Top Tips

- You can hand write or type your fact sheets.
- Be selective – decide what you believe to be the most important details about each person!
