

# Emerging Technology

Emerging technology simply means brand new technology and also existing technology that is being improved and used in new ways. Select FOUR from the following:

- Artificial intelligence
- Biometrics
- Robotics
- Virtual reality
- Drones
- Augmented reality
- 3D printing
- Internet of things

Present your findings as a PowerPoint presentation, and for each one of the above you select include the following:

1. Explain what this technology is.
2. Explain how it could be used by individuals at home.
3. Explain how it could be used within the workplace.
4. Implications of these emerging technologies - both positive and negative.
